CAREER SUMMARY

A final year B. Tech Computer Science undergraduate specializing in AI systems for visual intelligence with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, DBMS, and Software Development. Experienced in building backend applications and REST APIs using Java, Spring Boot, SQL, and React.js. Hands-on experience in backend development, REST API integration, debugging, and scalable application for development. Familiar with prompt engineering and cloud fundamentals through AWS and Azure AI certifications. Strong analytical, problem-solving, and collaborative skills with experience developing scalable and efficient applications.

PROFESSIONAL EXPERIENCE

AI INTERN | AICTE

May 2025 – June 2025

- Designed and enhanced ImageIQ an AI powered system for image analysis and OCR using Python, OpenCV and TensorFlow.
- Built modular processing pipelines for image preprocessing, feature extraction, and text recognition.
- Improved system efficiency by reducing manual document processing effort by 50%.
- Performed debugging, testing and performance optimization to enhance system reliability and accuracy. Demonstrated ownership of full development lifecycles from design to testing and optimization.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript, SQL

Backend development: Spring Boot, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Core CS: Data Structures, Algorithms, OOPs, DBMS, Operating Systems.

Software Engineering: Git, GitHub, Software Development Lifecycle (SDLC), Agile Methodologies (Scrum), Testing and Debugging.

Frontend: HTML5, CSS, JavaScript, React.js.

AI/ML: Image Processing, OpenCV, TensorFlow., CNN, RAG.

PROJECTS

AI Surgical Assistant – Real-Time Decision Support System

- Created a multi-modal decision-support system for real-time clinical assessment using physiological and visual data
- Integrated the Grok API with custom prompt automated risk analysis workflows.
- Built a system generating **structured clinical reports with actionable recommendations in <3 seconds on CPU.**

Nirmaan- A Hackathon registration website

- Developed a **full-stack web application** with backend services for managing hackathon registrations and participant workflows
- Planned and implemented **REST APIs** for user authentication, registration and participant management.
- Built an admin dashboard with **data export and reporting capabilities**
- Integrated **automated email notification system** for real-time communication.

EDUCATION

B.Tech | KL University|CGPA:9.76

2023 – 2027

CERTIFICATIONS

- Earned the **AWS Cloud Practitioner** certification.
- Completed the **Microsoft Azure AI Engineer Associate (AI-102)** certification.
